

I consider the Sinclair Broadcast Group's airing this "documentary" completely illegal and highly unethical. If they proceed with this blatant use of our public airways by forcing people to watch it, they should have their FCC license revoked for every one of its stations. Many of the big business and government's actions are, I fear, bringing the USA into the realm that the old USSR was, being fed only what certain people and groups want the public see. I strongly urge our Congress and FCC take immediate action to correct this injustice.
